After Cleaning data and creating dashboard we can see the below visuals, which is an interactive dashboard.

From the visual it is clear that we have 139 heart disease patients which is 46% of the data.

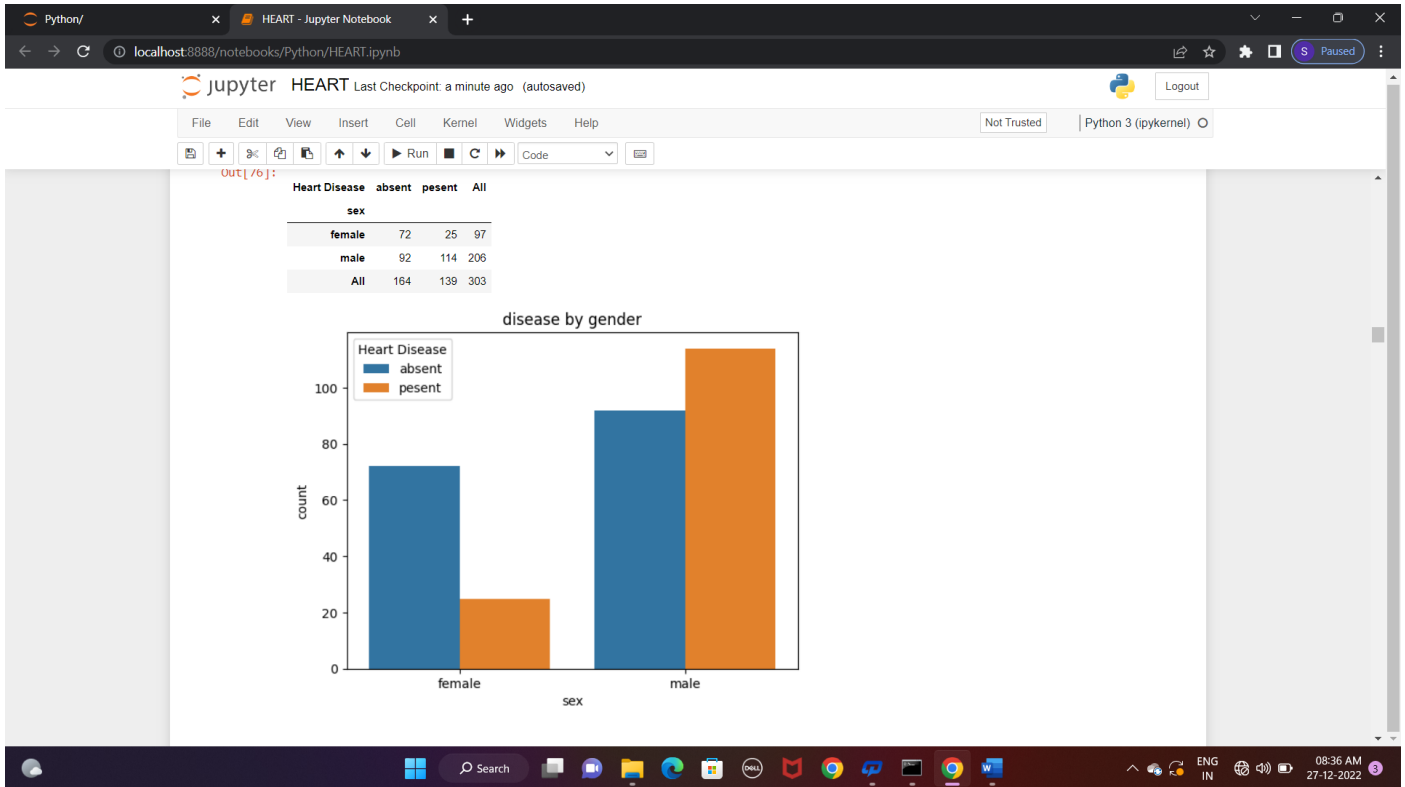

Wireframe Document Design

The graph shows that the people suffering from the heart disease are more in the age group of 45-60 which is almost 26% of the data.

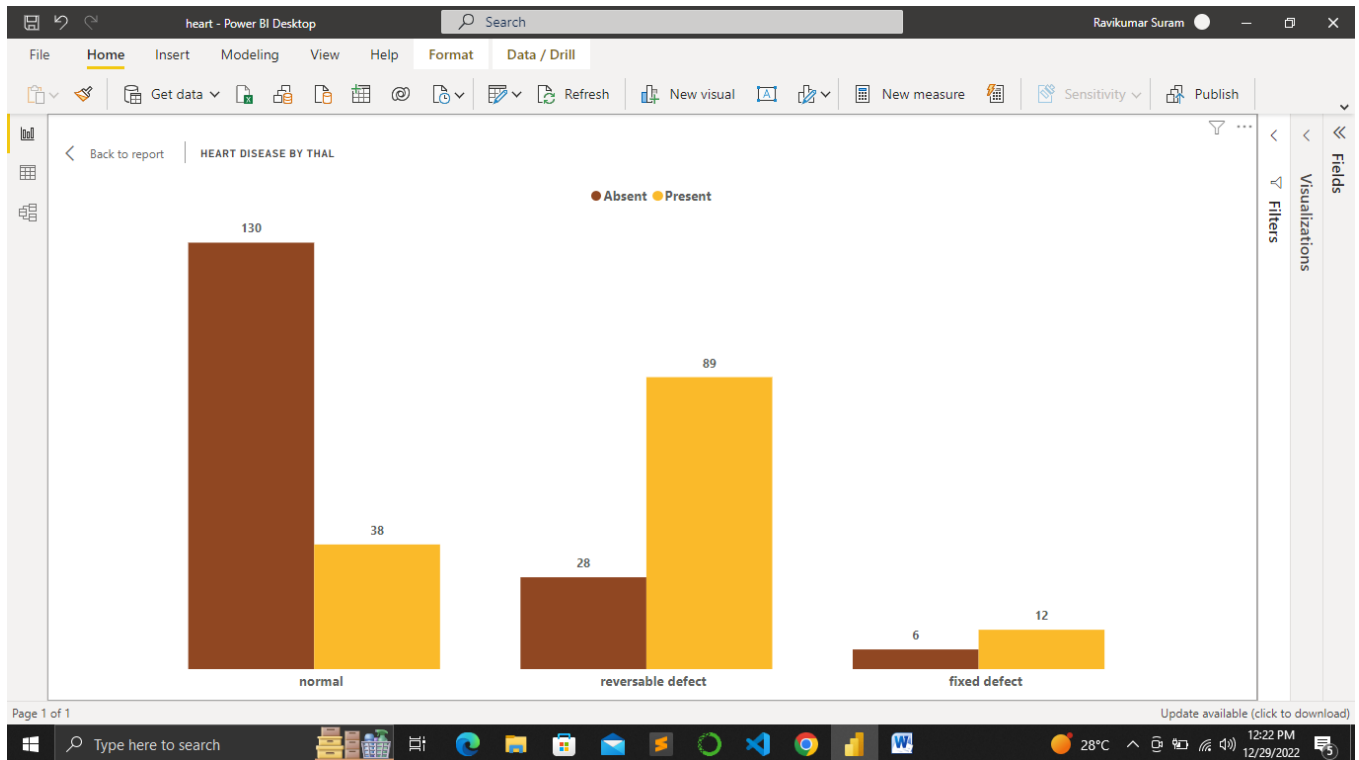

Wireframe Document Design

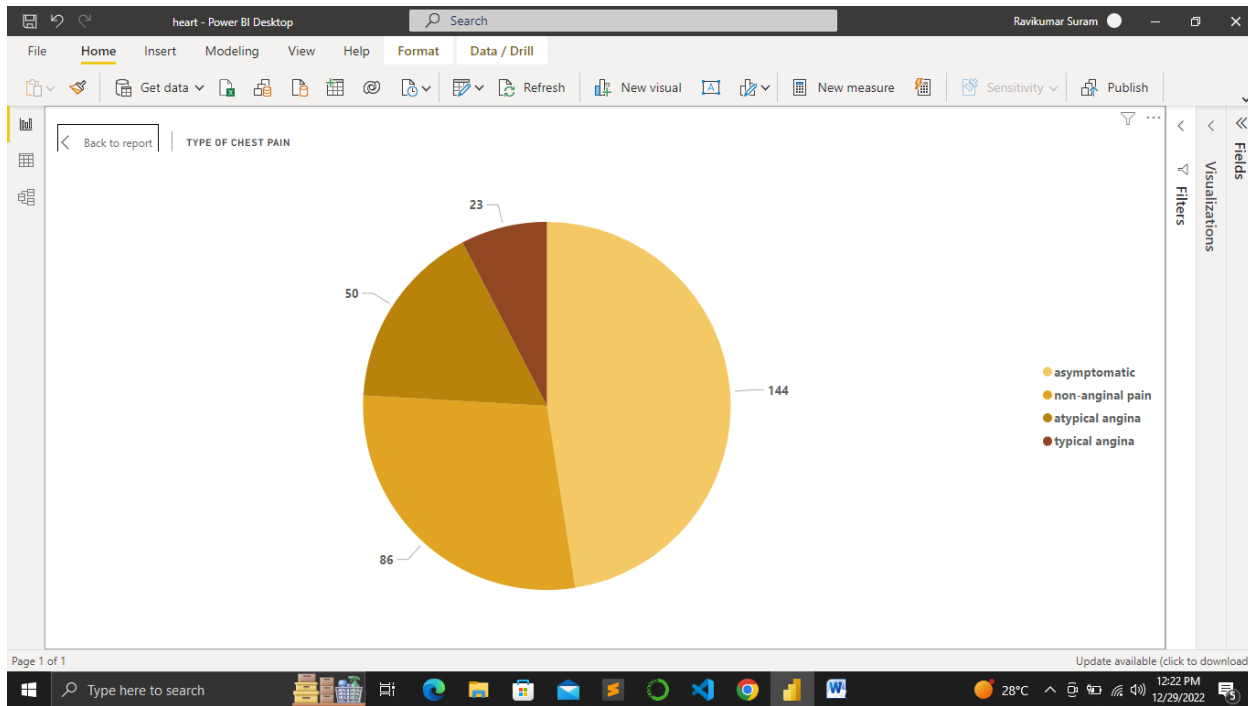

The below graph shows that men are more prone to heart disease as compared to women.
